

Managing your family's prescriptions

Does your family have one person who manages the prescriptions? If so, you can give adult family members covered under your pharmacy benefit plan permission to access your account, including the ability to order refills for you and check your order status.

Start by asking each participating adult family member to register at [Caremark.com](https://www.caremark.com) and complete these steps:

1. Select 'Profile' at the top of any page, after signing-in
2. Choose 'Family Access' from the 'Update My Profile' section of the page
3. Follow the instructions

This process can also be completed by selecting the profile icon on the CVS Caremark® mobile app.

At [Caremark.com](https://www.caremark.com), your family's designated prescription manager can:

- View your family's orders
- Order and transfer refills
- View prescription histories
- Request new prescriptions from your doctors

Manage family prescriptions anytime, anywhere — visit [Caremark.com/familyaccess](https://www.caremark.com/familyaccess) or download the CVS Caremark mobile app

Your privacy is important to us. Our employees are trained regarding the appropriate way to handle your private health information.
